## **PUBLIC NOTICE UPDATE**

### **TEMPORARY WATER SUPPLY BRUNSWICK FOREST April 15, 2016**

The repair was successfully completed and the line was flushed yesterday. The County took state required samples late yesterday so the results should be available late today. Due to the weekend and not wanting to make the transition over the weekend, the plan is to make the transition back to the County service Monday morning.

The temporary connection for main water supply will still be established for the water system that serves Brunswick Forest and surrounding areas until Monday April 18, 2016.

Town staff will still monitor the water pressure throughout the system during this period. The temporary water supply is from the same source and the same quality as the current water supply.

The Town still asks that you limit your outside water usage during this time (irrigation, car washing, etc.). Once the water main is back in service, you will be notified that you may resume regular outside usage.

Please contact Jimmy Strickland, Public Services Director for the Town of Leland, at 910-332-4651 or e-mail [jstrickland@townofleland.com](mailto:jstrickland@townofleland.com) if you have any questions.
